PLANT & EQUIPMENT HIRE

PART OF SRB GROUP OF COMPANIES

SRB Group operates a large Plant Hire division. We can offer services of a wide range of plant and equipment, including; Tipper truck and water truck, excavators, loaders, skid steers, trucks, cherry pickers - and the list goes on!

SRB's plant division maintains close relationships with both local and international equipment manufacturers to allow us to source and mobilise equipment to suit most requirements on short notice and highly competitive rates.

Short and long term rental periods are available on both wet and dry hire arrangements.

Health & Safety

Integrity

Collaboration

Why Choose PSG?

- ✓ HRIA Certified – Safety, compliance, and industry credibility
- ✓ One of the largest excavator fleets south of Perth
- ✓ In-house transport fleet = fast, reliable delivery
- ✓ Flexible hire options (short & long term)
- ✓ Transparent pricing, responsive support
- ✓ Locally owned and WA trusted

What We Offer

- Excavators (1.7T-21T) – Caterpillar, Hitachi, Sumitomo
- Skid Steers / Posi Tracks – Kubota, Terex, Caterpillar
- Compactors & Rollers – Bomag, Wacker Neuson, Dynapac
- Cable Hauling Gear – Winches, snakes, duct tools
- VMS Boards – Solar-powered, road-compliant
- Trucks - Water trucks, tipper trucks and Hiab trucks.
- Forklift and Telehandlers
- Generators – Various
- Trailers & Site Tools – Job-ready

Our commitment to OH&S

We comply with:

- Relevant legislation and regulations
- Construction industry codes of practice
- Standards specified in contracts

About Us

Founded in 2005, PSG Plant Hire (formerly SRB Contracting) has built a reputation as a trusted provider of high-quality construction and maintenance solutions across Perth and the North West. With a focus on excellence, we've invested in state-of-the-art equipment, skilled personnel, and industry-leading technology. Our commitment to delivering projects safely and on time has earned us preferred contractor status among many of our clients. Led by Managing Director P. Govedarica, PSG Plant Hire is dedicated to supporting diverse project needs, from routine maintenance to emergency breakdowns.

Our Vision & Mission

Vision Statement: To be the trusted leader in plant and equipment hire across the mining, civil, and construction sectors delivering reliable machinery, expert support, and innovative solutions that drive our clients' success and build a stronger future.

Mission Statement: At PSG Plant and Equipment Hire, our mission is to provide safe, high-quality, and cost-effective plant hire solutions tailored to the unique needs of the mining, civil, and construction industries. We are committed to operational excellence, customer satisfaction, and supporting projects of all sizes with modern equipment, skilled operators, and responsive service—every time.

Petar Govedarica

SRB Group of Companies - Managing Director

SRB Group of Companies is led by Managing Director Petar Govedarica, whose career spans over two decades in the Mechanical and Civil Engineering sectors. His extensive industry knowledge has earned him a solid reputation as a respected figure in the Perth community.

Petar remains actively involved in all aspects of SRB, bringing a hands-on approach and a wealth of expertise both on and off-site. Before venturing into SRB, Petar built a successful career working with leading companies, including Newcrest Mining and Orontide Holdings.

TRUCKS AND FORKLIFTS

We offer a variety of trucks and forklifts to suit any project. Fleet includes; Flatbed Truck, Hiab Truck, Water Truck, Tipper and prime movers

EXCAVATORS

Our excavator hire services provide you with machines that are regularly serviced and maintained to the highest standards. Our excavators range from 1.7 tonne to 21 tonne.

SKID STEERS AND POSITRACKS

Posi Tracks loaders are perfect for a wide range of earthmoving and construction projects. Whether you're working on soft, uneven, terrain or in tight spaces, our fleet of Positracks and Skid Steers will help you get the job done efficiently! Range: From 3.5 tonne.

AVAILABLE FOR HIRE

GENERATORS

Whether you need backup power or a primary source of electricity, our selection of generators is perfect for any situation, ensuring that you have consistent and efficient power whenever and wherever it's needed.

COMPACTORS

Our fleet of compactors is designed to meet the highest standards of performance and safety. Models include: Bomag BPR 25/45, Bomag BPR 45/55, Bomag BPR25/45-3, Plate Compactor, Bomag Jumping Jack, Crommelins Plate Compactor, Dynapac LH700 Plate Compactor, Wacker Neuson BS65-4, Jumping Jack, Wacker Neuson, DPU40/45 Plate Compactor, Wacker Neuson MPI5-CE, Wacker Neuson MP70

ROLLERS

Our roller hire services in Perth provide access to well-maintained and modern machinery that delivers excellent compaction results across various terrains. We understand that compaction is a critical part of any construction or roadwork project, which is why we offer a variety of rollers to cater to different project sizes and needs.

VACUUM TRUCKS AND TRAILERS

Smart Solutions for Non-Destructive Excavation

At PSG Plant and Equipment Hire, our Vacuum Trucks and Vacuum Trailers offer a powerful and precise solution for non-destructive digging, service locating, and slurry removal. Whether you're working in civil construction, utilities, or tight-access urban environments, our vac units deliver safe and effective excavation without damaging underground infrastructure.

WHY HIRE FROM PSG?

- ✓ **Well-Maintained Fleet** – Modern, reliable vac trucks and trailers ready for demanding jobs
- ✓ **Flexible Options** – Trailer-mounted or truck-mounted units to suit your site requirements
- ✓ **Expert Support** – Our experienced team ensures fast delivery and practical advice
- ✓ **Compliance & Safety** – Fully compliant equipment with a focus on operator safety

Applications Include:

- Non-destructive digging (NDD)
- Underground service location
- Potholing and trenching
- Mud, slurry, or debris removal
- Tight-access or sensitive-area excavation

Fleet Options Available:

Vacuum Trucks – Powerful suction, larger capacity, ideal for heavy-duty or high-volume excavation

Vacuum Trailers – Compact, towable units perfect for confined spaces and lighter work.

Ready When You Are

Whether you're clearing out slurry, exposing services, or preparing ground safely, our vac units are available for short-term or long-term hire with rapid turnaround and competitive rates.

INHOUSE TRANSPORT & LOGISTICS

At PSG Plant and Equipment Hire, we don't just supply the machinery — we deliver a fully integrated transport and logistics solution tailored to the demands of the mining, civil, and construction sectors. Our dedicated heavy haulage fleet, including low loaders, floats, and tilt trays, ensures safe and efficient delivery of plant and equipment to even the most remote or hard-to-access project sites. With strict adherence to transport regulations, mine site compliance, and real-time GPS tracking, we guarantee reliable, on-time mobilisation and demobilisation. Whether you need a single machine or full-site mobilisation, PSG provides end-to-end service — from our yard to your site.

If you have specific towing needs for machinery relocation or oversized equipment, contact us to assess your requirements.

Our highly trained team will evaluate your load capacity needs and deploy the appropriate towing vehicle for your convenience.

Skidsteer vs Bobcat: A Comparison

What is a Skidsteer?

A skid steer is a versatile piece of machinery with four wheels or two tracks, typically used for digging, lifting, and moving materials. The machine can pivot, or "skid," by having its wheels move independently of each other, which gives it excellent maneuverability in tight spaces. Skid steers are compatible with various attachments, including buckets, forks, and augers, making them a go-to machine for a range of construction tasks.

What is a Bobcat?

A Bobcat is actually a brand name, but over time, the term has become synonymous with skid steers. Bobcat Company manufactures a range of compact construction equipment, including skid steers, mini excavators, and loaders. While Bobcat skid steers are extremely popular, other manufacturers produce similar machines. Therefore, all Bobcats are skid steers, but not all skid steers are Bobcats.

When to use a Skidsteer

- **Excavating and Digging:** With the right attachment, skid steers can handle light to medium digging tasks.
- **Material Handling:** These machines are often used for moving materials such as gravel, dirt, and debris.
- **Grading and Leveling:** Skid steers are frequently used to prepare surfaces by grading and leveling the ground.
- **Clearing:** Skid steers with grapple or bucket attachments are great for clearing debris, trees, or rubble from the job site.

Why Hire a Bobcat?

- ➔ Versatility for different projects
- ➔ Cost effective and convenient
- ➔ Efficient for tight spaces
- ➔ Increased productivity
- ➔ Experienced operators available

Compactor Hire: What to know

Why is Compaction Important?

Before any construction begins, it's crucial to ensure the ground is compacted to create a stable base. Proper compaction reduces the risk of settling or shifting, which can lead to structural issues, uneven surfaces, or cracks.

Compactors apply pressure to the ground, ensuring that the materials beneath are densely packed, which:

- ✓ **Improves Load Bearing:** Compacting the soil increases its ability to bear the weight of structures or heavy machinery.
- ✓ **Prevents Shifting:** Properly compacted surfaces minimize the risk of soil shifting or erosion over time.
- ✓ **Creates Smooth Surfaces:** Compaction results in smoother, level surfaces, which is essential for road construction and laying foundations.

TYPES OF COMPACTORS

- **Smooth Drum Rollers:** Ideal for compacting granular soils, gravel, and asphalt. Smooth drum rollers are commonly used in road construction and are great for achieving a high level of compaction in large, open areas.
- **Padfoot Rollers:** Also known as sheepfoot rollers, these compactors are designed for compacting cohesive soils like clay. The pads on the drum penetrate deep into the soil, achieving a high level of compaction.
- **Vibratory Rollers:** These rollers use both weight and vibrations to achieve maximum compaction. Vibratory rollers are suitable for compacting both granular and cohesive soils and are often used for road construction, parking lots, and building foundations.
- **Plate Compactors:** Smaller and more portable than rollers, plate compactors are used for compacting smaller areas such as driveways, patios, or trench backfill. They are ideal for landscaping and residential projects.
